Nexora Product Documentation

NexaDesk, NexaFlow and NexaInsight: features, plans, service levels, security and system requirements

Document ID	NX-PRD-001	Version	5.2
Document owner	Product Management (CTO Office)	Effective date	1 August 2026
Applies to	Customers, sales, support and implementation teams	Classification	Internal - Confidential

Abstract. This document describes the Nexora product suite: NexaDesk (AI-powered helpdesk), NexaFlow (workflow automation) and NexaInsight (analytics). It explains architecture, key features, subscription plans and pricing, service level agreements, security and compliance, data residency, supported integrations, usage limits and system requirements, and outlines the onboarding process for a new customer workspace.

Keywords: NexaDesk, NexaFlow, NexaInsight, RAG, helpdesk automation, subscription plans, SLA, SOC 2, integrations

1. Product Suite Overview

Nexora Technologies provides three products on a shared platform. **NexaDesk** helps support teams resolve tickets faster with AI triage and answer suggestions grounded in the customer's knowledge base. **NexaFlow** automates repetitive processes using a no-code workflow builder. **NexaInsight** turns support and workflow data into dashboards and scheduled reports. All products are exposed through the Nexora Platform API (NX-ENG-001).

Figure 1. Nexora product suite and shared platform.

2. Key Features

2.1 NexaDesk

- **AI triage:** classifies tickets by topic, urgency and sentiment and routes them to the right queue.
- **Answer suggestions (RAG):** agents see draft replies grounded in the customer's knowledge-base articles with source links, reducing hallucination risk.
- **Multilingual:** English and Urdu supported for triage, suggestions and summaries; Arabic in beta.
- **SLA timers** and escalation rules, conversation summaries, and macros for common answers.

2.2 NexaFlow

- Drag-and-drop builder with more than 150 pre-built actions and triggers (ticket events, schedules, webhooks).
- Human approval steps, conditional branches and retries; every run is logged for audit.

2.3 NexaInsight

- Prebuilt dashboards for ticket volume, first response time, resolution time and CSAT.
- Scheduled reports by email, CSV and PDF export, and custom metrics on the Growth and Enterprise plans.

3. Plans and Pricing

Pricing is per agent per month in US dollars. Annual billing gives approximately a 20% discount compared with monthly billing. Every new workspace starts with a **14-day free trial** with Growth features.

Table 1. Subscription plans.

Feature	Starter	Growth	Enterprise
Price (annual billing)	USD 15 per agent per month	USD 39 per agent per month	USD 79 per agent per month (minimum 25 agents)
Price (monthly billing)	USD 19	USD 49	USD 99
NexaDesk AI triage and suggestions	Basic triage only	Included	Included with custom model tuning
NexaFlow workflows	5 active workflows	50 active workflows	Unlimited
NexaInsight	Standard dashboards	Custom metrics, scheduled reports	Custom metrics, data export to warehouse
Single sign-on (SAML 2.0 / OIDC)	Not available	Not available	Included
API rate limit	60 requests per minute	300 requests per minute	1,200 requests per minute
Knowledge base storage	1 GB	10 GB	100 GB

4. Service Levels and Support

Availability is measured monthly across production services, excluding scheduled maintenance announced 5 days in advance. If availability falls below the commitment, eligible customers receive service credits on the next invoice.

Table 2. Availability commitment and support by plan.

Plan	Monthly uptime	Approx. downtime allowed (30-day month)	Support channel and first response
Starter	99.5%	216 minutes	Email; within 1 business day
Growth	99.9%	43 minutes	Email and chat; within 8 business hours
Enterprise	99.95%	22 minutes	24x7 phone, email and chat; P1 within 1 hour; dedicated customer success manager

Figure 2. Downtime allowed by the availability commitment of each plan.

5. Security, Compliance and Data Residency

- Nexora holds **SOC 2 Type II** and **ISO/IEC 27001** certifications and supports GDPR data-processing agreements.
- Data is encrypted in transit (TLS 1.2+) and at rest (AES-256). Role-based access control and audit logs are available on all plans.
- Customer data is not used to train shared AI models. AI features call approved model providers under zero-retention terms.
- Data residency: customers choose Mumbai (India), Frankfurt (Germany) or Bahrain at workspace creation; the region cannot be changed later without migration.
- Backups are taken daily and retained for 35 days; recovery point objective is 24 hours and recovery time objective is 4 hours.

6. Integrations, Limits and Requirements

Table 3. Usage limits and supported technologies.

Item	Value
Supported channels	Email, web chat widget, WhatsApp Business, Microsoft Teams, Slack
CRM and tools	Salesforce, HubSpot, Jira, Zapier, and custom integrations via API and webhooks
Maximum attachment size	25 MB per file
Knowledge base article size	Up to 100,000 characters; supported formats: HTML, Markdown, PDF, DOCX
Supported browsers	Latest two versions of Chrome, Edge and Firefox; Safari 16 or newer
Mobile apps	iOS 16+ and Android 10+

7. Customer Onboarding

Figure 3. Typical onboarding steps for a new NexaDesk workspace.

A typical Growth-plan customer goes live in 2 to 3 weeks. Enterprise implementations include a project plan, SSO configuration and a security review, and usually take 6 to 8 weeks.
